WHO IS ELIGIBLE FOR A 3RD DOSE OF THE PFIZER VACCINE?

The Center for Disease Control (CDC) is recommending that moderately to severely immunocompromised people receive an additional dose. This includes people who have:

- Been receiving active cancer treatment for tumors or cancers of the blood.
- Received an organ transplant and are taking medicine to suppress the immune system.
- Received a stem cell transplant within the last 2 years or are taking medicine to suppress the immune system.
- Moderate or severe primary immunodeficiency (such as DiGeorge syndrome, Wiskott-Aldrich syndrome).
- Advanced or untreated HIV infection.
- Active treatment with high-dose corticosteroids or other drugs that may suppress your immune response.

People should talk to their healthcare provider about their medical condition and if they meet the above criteria for getting an additional dose.
